

HIT THE GAS WITH OUR **NEXI**TM IoT SOLUTION

AND ACCELERATE THE GROWTH
OF YOUR BUSINESS

NEW IoT SOLUTION

WHAT IF YOU COULD
MONITOR AND MANAGE
GAS CYLINDERS FROM
YOUR COMPUTER
OR SMARTPHONE?

With
NEXI™ you can.

**INTRODUCING NEXI™
THE IoT SOLUTION**

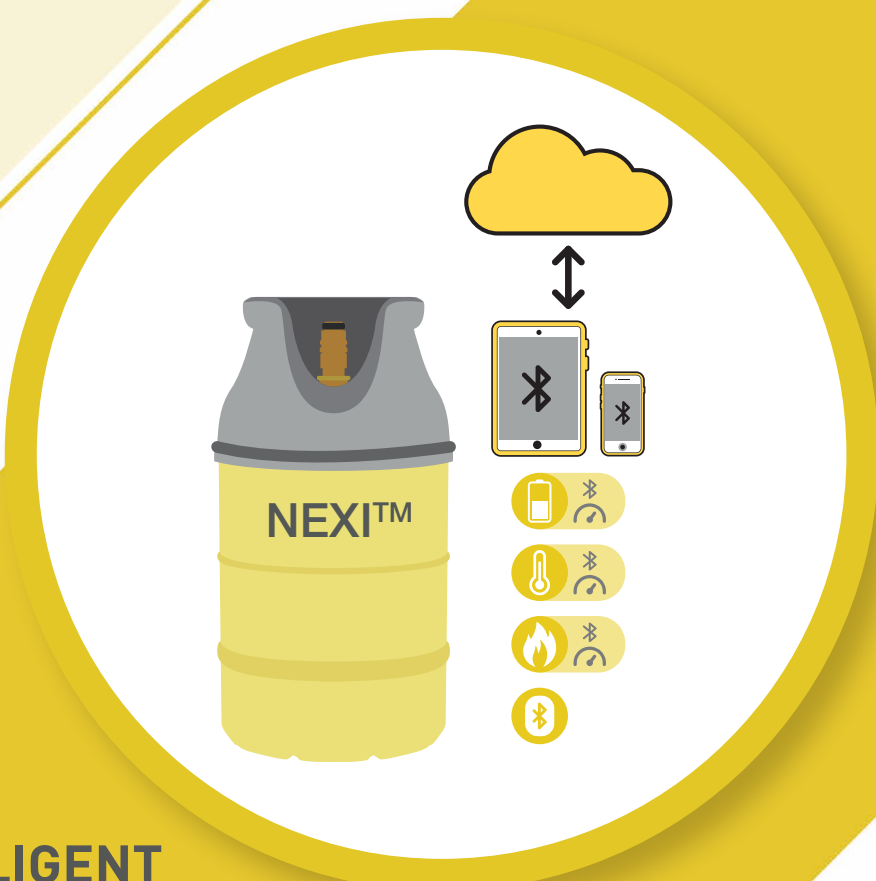

With NEXI™ technology, a new era of gas cylinder management begins for the LPG distributors and end-users, generating system data for more efficient, sustainable and intelligent control.

A REVOLUTIONARY TECHNOLOGY

A small cylinder-mounted IoT device that generates system data for more efficient and intelligent control, including smart full fleet management enabled by geolocation.

AN INTELLIGENT APPROACH

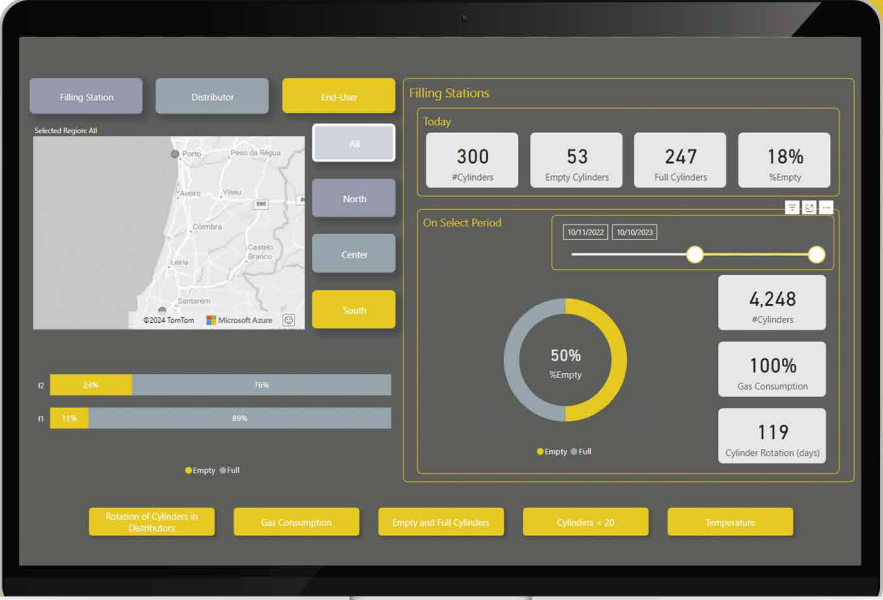

The NEXI™ solution includes a small cylinder-mounted IoT device that generates system data for more efficient, sustainable and intelligent control. The device also enables geolocation for smart fleet management.

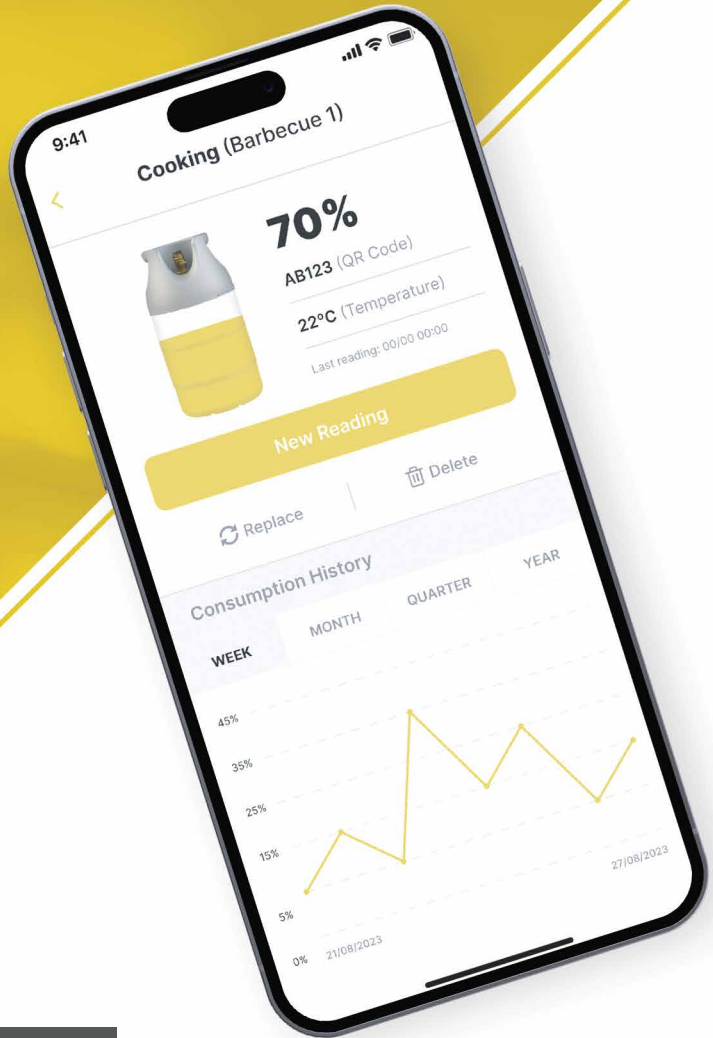

NEXI™ technology enables end-users to monitor cylinder gas level, review gas usage history, and order a new cylinder via their smartphones.

LPG SERVICE BENEFITS

- Fleet management/ Inventory management
- Customer satisfaction and loyalty
- Location and asset management
- Real-time data
- Targeted marketing campaigns
- Brand innovation
- Sales mapping
- Operational cost reduction
- Consumption/ Sales improvement and forecast
- Reduced environmental footprint

END-USER SERVICE BENEFITS

- Gas level control (and alert)
- Easy and/or automatic ordering via App
- Possibility of programmed order via App
- Quick response
- Consumption/orders register

DELIVERING INNOVATION SINCE 1962

AMTROL-ALFA,

a Worthington Enterprises company, forges safety and innovation together. Our position as Europe’s largest manufacturer of gas cylinders comes from more than 50 years of experience and constant efforts to offer value-adding features and better performance on each product, every day. A long list of patents and intensive research are just a few reasons that make Amtrol-Alfa a true leader in this field.
