

FOURTIS[®]

THE RECYCLABLE TYPE IV CYLINDER

Amtrol-Alfa's Type IV cylinder sets out to become the high watermark of its class. Green at heart, the Fourtis is made from fully recyclable materials, but doesn't compromise its quality to save on end-of-life costs. Also built to last, the Fourtis is a thoroughly resistant product – and not just to impact, but also to corrosion and permeability. All this wrapped inside a customizable, easy to clean and finely designed jacket. The Fourtis is not just eco-friendly, it's eco-passionate.

INNOVATION IS GREEN.

- Fully recyclable materials >
- Lightweight >
- Low maintenance cost >
- Corrosion free >
- Easy to clean >
- Color variety in customization >

THROUGH
INNOVATION

THE “FOUR ELEMENTS” TECHNOLOGY

VECTORS OF FORTITUDE

Polymeric Jacket – Featuring finely crafted design, the UV resistant jacket is stackable with compatible cylinders and features ergonomic handles. It is also demountable, making the reassembling easy.

Impact Resistance Design – A differentiating concept, the innovative design helps to dissipate the energy from physical impacts on the top and the bottom of the cylinder.

Composite Layer – Between the liner and the cover rests the glass fiber with PP matrix composite structure (fully recyclable), increasing lightness, strength and resistance to impact.

Polymeric liner – This polymeric liner with integrated barrier film ensures high impermeability.

- < Saves on decommissioning costs
- < BLEVE free – Fire resistance test approved (EN14427:2004)
- < Ergonomic and easy handling
- < Demountable jacket
- < Fully stackable with compatible cylinders
- < Improves company branding

LPG MODEL RANGES

HEIGHT mm	383	578	606
DIAMETER mm	310	310	310
WATER CAPACITY L	12,5	24,5	26,2
TARE WEIGHT kg	4,3	5,7	6,1
BUTANE kg	6	12	13
PROPANE kg	5	10	11

All dimensions are approximate

APPROVALS

Striving for global acceptance, the Fourtis can be manufactured according to many construction standards, including:

- ISO 11119-3
- EN 14427
- EN 12245

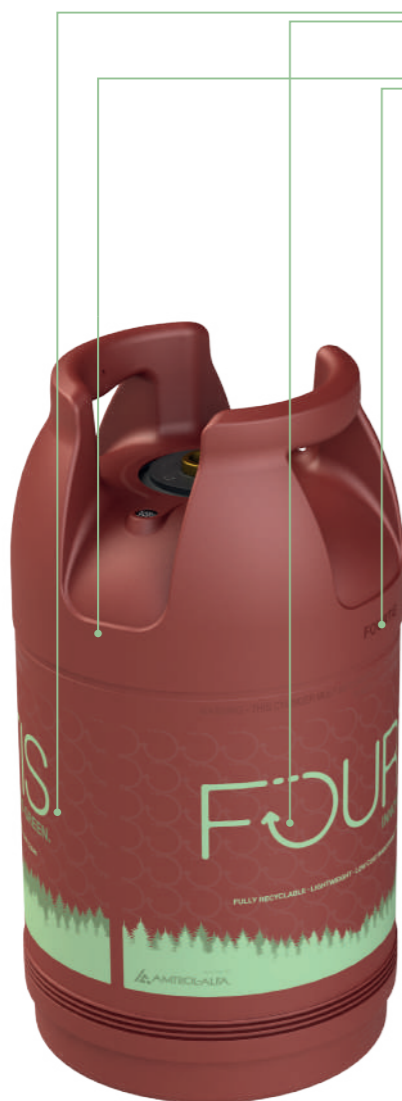

MILLIONS OF COMPOSITE CYLINDERS IN USE WORLDWIDE

CUSTOMIZATION

The FOURTIS incorporates **In-Mould Labeling (IML).**

This technology consists in the insertion of printed labels in the mould where the plastic is injected. The result is outstanding integration into the cylinder jacket. The labels themselves are powerful marketing tools, available in a wide range of colors and supporting high-definition design. Different colors can be applied on the body and on the top.

IN-MOULD LABELING (IML)

ENGRAVED COMPANY NAME

AMTROL-ALFA SAFETY AND INNOVATION WELDED TOGETHER.

Amtrol-Alfa, a Worthington Enterprises company, forges safety and innovation together. Our position as Europe's largest manufacturer of gas cylinders comes from more than 50 years of experience and constant efforts to offer value-adding features and better performance on each product, every day. A long list of patents and intensive research are just two of the reasons that make Amtrol-Alfa a true leader in this field.

Innovation is the only thing we can't hold inside.
