

CUSTOMIZATION

Embossing – A branding tool that will stand the test of time.

Polymeric Patented Shrouds – Adding a sophisticated look, our polymeric shrouds and soft grips are ergonomic and allow you to safely handle and stack cylinders.

Fluid Labeling Technology (FLAT) – Allowing multiple colors, this technology combines efficiency, appeal, and stability against abrasion.

Silkscreen – High quality decorations available in a wide range of colors.

RFID/NFC – These state of the art microchip technologies allow precise tracking, fast identification and real-time database assessment, improving consumer experience, and optimizing labor and filling costs. Connecting suppliers and end-users has never been this easy.

AMTROL-ALFA SAFETY AND INNOVATION WELDED TOGETHER.

Amtrol-Alfa, a Worthington Industries company, forges safety and innovation together. Our position as Europe's largest manufacturer of gas cylinders comes from more than 50 years of experience and constant efforts to offer value-adding features and better performance on each product, every day. A long list of patents and intensive research are just two of the reasons that make Amtrol-Alfa a true leader in this field.

Innovation is the only thing we can't hold inside.

RAZÃO CATRADREV.3

TRADITIONAL INNOVATION IS ALL-AROUND.

**WORLD #1
MANUFACTURER OF STEEL
AND COMPOSITE LIGHT
WEIGHT CYLINDERS**

TRADITIONAL STEEL LPG CYLINDERS

Whether they're used for cooking, heating or leisure: mastering the basics is essential. 50 years of world-class steel gas cylinder manufacture and research have rendered Amtrol-Alfa masters in the fundamentals. Although known as traditional cylinders, it's clear how innovative they have become.

INNOVATION IS ALL-AROUND.

Rigorous Quality Control ➤

Special protective coating provides corrosion and impact resistance ➤

Options for ergonomic plastic shrouds and soft grips ➤

Integrated welding cells ensure process stability ➤

DIFFERENTIATION

Amtrol-Alfa provides polymeric shrouds and soft grip options for traditional cylinders, turning these classic products into ergonomic and differentiated solutions.

◀ Reliability and precision

◀ Durability through heat-treated steel

◀ Finishing applied by robotic systems

◀ Customizable labeling

MODEL RANGES

Our TRADITIONAL family is numerous. The combinations of diameter, height, weight or volume available make sure different demands can be met. Amtrol Alfa strives for global acceptance: hundreds of available cylinder models complying with almost every international construction standard around the world.
