

AN INTELLIGENT WAY OF MANAGING

What if you could monitor gas cylinders from your mobile phone? With Nexi™, you can. Home users and distributors now have a smart system that collects and provides valuable data on their gas cylinders, such as consumption and location. Individual users can use the app to track, supervise and request a new gas cylinder whenever needed. Nexi™ puts distributors in the unique position to create database for responding to customer needs, while reducing operating costs and implementing more sustainable logistics.

AMTROL-ALFA SAFETY AND INNOVATION WELDED TOGETHER.

Amtrol-Alfa, a Worthington Industries company, forges safety and innovation together. Our position as Europe's largest manufacturer of gas cylinders comes from more than 50 years of experience and constant efforts to offer value-adding features and better performance on each product, every day. A long list of patents and intensive research are just two of the reasons that make Amtrol-Alfa a true leader in this field.

Innovation is the only thing we can't hold inside.

CATNEXI
RAZÃO

NEXI INNOVATION IS SMART.

**CREATING
VALUE
THROUGH
INNOVATION**

NEXI™

With Nexi™ technology, a new era of gas cylinders management is beginning.

Amtról-Alfa has developed a new cylinder-mounted device that generates system data for more efficient, sustainable, and intelligent control. This innovation benefits distributors, individual users, and the environment.

INNOVATION IS SMART.

CREATING
VALUE
THROUGH
INNOVATION

A REVOLUTIONARY TECHNOLOGY

The cylinder-mounted device will redefine the industry with its geolocation solution. This device reads important data from the cylinder usage and shares it with the user.

SMART SOLUTION

Nexi™ improves user experience. The data this smart solution provides helps optimize resource management. Through the app, the user can check gas levels and temperature. In addition to delivering real-time usage data, Nexi™ creates a usage record and thus enables re-order activation.

GEOLOCATION & POWER OF DATA

NEXI™ is a game-changer for all distributors in the LPG industry. With the collected data, commercial users can generate a sophisticated analytics system by accessing live information shipping and stock management. With this information, they can tailor personalized marketing campaigns to categories of customer. In addition, distributors can optimize their service schedules to reduce transportation logistics costs, and hence their environmental impact. Nexi™ will help improve customer satisfaction and encourage brand loyalty.
